

NUMERAL-HEIGHT CALIBRATION SHEET

Print at 100%. Photograph with your camera at several distances and angles.
Then: `python backend/impccli.py calibrate-physical <folder> --marker-mm <measured>`

Rows are ordered by increasing height; the calibrator pairs measurements with truth in that order.
Verify a row with calipers before trusting the fitted band.

row target 1.0 mm	TRUE numeral height 1.0000 mm
row target 1.5 mm	TRUE numeral height 1.5000 mm
row target 2.0 mm	TRUE numeral height 2.0000 mm
row target 2.5 mm	TRUE numeral height 2.4977 mm
row target 3.0 mm	TRUE numeral height 3.0057 mm
row target 4.0 mm	TRUE numeral height 3.9793 mm
row target 5.0 mm	TRUE numeral height 4.9953 mm
row target 6.0 mm	TRUE numeral height 6.0113 mm
